Multifunction

Workgroup

The ultra high-speed network MFD revolutionising business productivity

Breakthrough speed that takes business productivity to a whole new level — 60 ISO ppm[†], the fastest print speed in its class¹

Quality without compromise — advanced PrecisionCore® technology and a stationary line head deliver both speed and professional-quality output

Conserve energy — up to 87 percent lower power consumption than colour lasers¹

Do more, with an intuitive user interface — scan to email or the cloud² — all from a user-friendly 9" (22.8 cm) touchscreen

Manage your printer fleet and keep costs in check — compatible with third-party software solutions for managing usage limitations, user authentication and more

Print from wherever business takes you — featuring Epson Connect™ solutions, with a full suite of mobile printing capabilities³

Optional professional finishers — the perfect solution for offset stacking, stapling, booklet-making, hole-punch and much more (image right includes booklet-maker and high capacity feeder)

Expedite your workflow — 5,350-page maximum paper capacity⁴ (2,350 standard) for high-volume printing

Make an impact, minimise costs — high-resolution (600 x 2400 dpi) colour output from a cost-effective MFD

Work smarter — dual-head, single-pass scanner simultaneously scans both sides of documents at up to 110 ipm⁵

Actual copy times will vary based on system configuration and page complexity. For more information, visit www.epson.com/copyspeed | *Replacement cartridge yields are based on ISO/IEC 24711 tests in Default Mode printing continuously. Cartridge yields vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink colour. All ink colours are used for printing and printer maintenance, and all colours have to be installed for printing. For print quality, part of the ink from the included cartridges is used for printer startup and a variable amount of ink remains in the cartridges after the "replace cartridge" signal.
